

JARRETT D. PHILLIPS, Ph.D.
School of Computer Science
Department of Integrative Biology
University of Guelph
✉ jphill01@uoguelph.ca
 [jphill01](#)

ACADEMIC APPOINTMENTS

Adjunct Professor, School of Computer Science 2023–Present
University of Guelph
Affiliated Faculty, One Health Institute 2026
University of Guelph

EDUCATION

Ph.D. in Computational Sciences, University of Guelph 2016–2022
Co-Advisors: Dr. Daniel Gillis and Dr. Robert Hanner
Advisory Committee Members: Dr. Deborah Stacey and Dr. Graham Taylor
Dissertation: A Novel Statistical Framework for Assessment of Intraspecific Haplotype Sampling
Completeness: Implications for DNA Barcode Gap Estimation

Master of Bioinformatics, University of Guelph 2013–2014
Co-Advisors: Dr. Robert Hanner and Dr. Daniel Ashlock
Major Paper: Assessing DNA Barcode Haplotype Sampling Diversity in the Ray-finned Fishes (Chordata: Actinopterygii)

BSc. (Hons.) in Biological Science, University of Guelph 2009–2013
Coursework in bioinformatics, ecology, evolutionary biology, comparative animal physiology, genetics, mathematics, and statistics

RESEARCH EXPERIENCE

Postdoctoral Fellow 2023–Present
University of Guelph
GBADs Informatics Team
Stacey Lab, School of Computer Science
Supervisor: Dr. Deborah Stacey

Postdoctoral Fellow 2023–Present
University of Guelph
Gillis Lab, School of Computer Science
Hanner Lab, Department of Integrative Biology
Supervisors: Drs. Daniel Gillis and Robert Hanner

Postdoctoral Fellow 2022
University of Guelph
Hanner Lab, Department of Integrative Biology
Supervisor: Dr. Robert Hanner

SOFTWARE DEVELOPMENT

GBADs ModelBuilder · R Shiny web application
HACSim (Haplotype Accumulation Curve Simulator) · R package · R Shiny web application ·
>50000 downloads · DOI: [10.32614/CRAN.package.HACSim](https://doi.org/10.32614/CRAN.package.HACSim)
Frequentist/Bayesian DNA barcode gap coalescent-informed estimators · R scripts
RulesTools · R package · >3000 downloads · DOI: [10.32614/CRAN.package.RulesTools](https://doi.org/10.32614/CRAN.package.RulesTools)
Seafood Fraud Modelling App · Python web application
VLF (Very Low Frequency) · R package · >40000 downloads · DOI: [10.32614/CRAN.package.VLF](https://doi.org/10.32614/CRAN.package.VLF)

TEACHING EXPERIENCE

Course Instructor 2025
University of Guelph
CIS*1910 – Discrete Structures in Computing I

Graduate Teaching Assistant (GTA) 2016–2020
University of Guelph
CIS*3130 – System Modelling and Simulation 2020
CIS*1910 – Discrete Structures in Computing I 2017
CIS*2460 – Modelling of Computer Systems 2016–2019

STUDENT SUPERVISION AND MENTORSHIP

* Indicates students under my direct mentorship/supervision
** Indicates students under my co-mentorship/co-supervision

Undergraduate

***Brendan Carl Rosario** 2025
Undergraduate Student Volunteer · Supervised Machine Learning for eDNA spatiotemporal sampling
***Richard Cui** 2025
Summer Undergraduate Research Assistant (URA) · Dynamical modelling of seafood fraud in the supply chain
***Nikolett Toth** 2024-2025
CIS*4900/4910 · Mining association rules for eDNA spatiotemporal sampling
***Nikolett Toth** 2024
Summer Undergraduate Research Assistant (URA) · Mining association rules for eDNA spatiotemporal sampling

*Fynn De Vuono-Fraser	2024
CIS*4900/4910 · Bayesian modelling of seafood fraud in the Canadian supply chain	
*Zaid Al-Gayyali	2023
Summer Undergraduate Research Assistant (URA) · Seafood Fraud Visualization Tool Shiny app	
*Fynn De Vuono-Fraser	2023
STAT*4600 · Bayesian modelling of seafood fraud in the Canadian supply chain	
*Navdeep Singh	2021
CIS*4900 · HACSim R Shiny web application	
*Scarlett Bootsma	2020–2021
CIS*4900/4910 · HACSim simulation study	
**Maya Persram	2020
Hanner Lab volunteer · R reporting ecological meta-analysis	
**Ashley Chen	2020
Hanner Lab volunteer · R reporting ecological meta-analysis	
**Olivia Friesen Kroeker	2020
Hanner Lab volunteer · R reporting ecological meta-analysis	
*Steven French	2018
CIS*4900/4910 · HACSim R package	
**Julia Harvie	2018–2019
MCB*4500/4510 · Data mining GenBank and BOLD	

Graduate

**Nathan Zeinstra	2024
IBIO*6070 · Bayesian habitat occupancy modelling of sea lamprey using eDNA	
**Amina Asif	2022
BINF*6999 · DNA barcode gap analysis of Canadian disease vectors and agricultural pests	
**Danielle St. Jean (withdrawn)	2018–2019
MSc. thesis (Mathematics) · DNA barcode sequence classification with machine learning	
**Christina Fragel	2018–2019
BINF*6999 · DNA barcode sequence classification with machine learning	
**Jiaojia (Paula) Yu	2018–2019
BINF*6999 · MDMAPR R Shiny app	
**Ankita Bhanderi	2018
BINF*6999 · Data mining GenBank and BOLD	

ASSISTANTSHIPS, AWARDS, SCHOLARSHIPS, AND GRANTS

Completed

Food From Thought Advancing Research Impact (ARIF) Fund – Livestock Innovation Grant	2024
A Modular Decision- and Policy-Making Tool for Global Livestock Disease Burden Assessment	
University of Guelph	\$40000.00 CAD

Food From Thought Advancing Research Impact (ARIF) Fund	2023
Forecasting Seafood Fraud Occurrence in the Supply Chain Within Major Canadian Cities Using Bayesian Hierarchical Binary Logistic Time-Series Regression Modeling	
University of Guelph	\$30000.00 CAD
SoCS Travel Grant	2019
University of Guelph	\$1000.00 CAD
Arthur D. Latornell Graduate Travel Grant	2019
University of Guelph	\$500.00 CAD
CPES Graduate Dean's Scholarship	2017
University of Guelph	\$3500.00 CAD
CPES Graduate Excellence Entrance (GEE) Scholarship	2016
University of Guelph	\$30000.00 CAD

To be Submitted

NSERC Discovery Grant	2026
University of Guelph	Amount \$TBD CAD
Computational Statistical Methods for Specimen Sampling Sufficiency and Species Genetic Diversity Assessment	
Role: Principal Investigator	
Advancing Research Impact Fund: "Quick Wins" Knowledge Mobilization Fund	2026
University of Guelph	\$20000 CAD
GBADs ModelBuilder as a Tool to Teach Livestock Population Dynamics and Disease Burden Risk Estimation	
Role: Co-applicant	
NSERC Alliance Society Grant	2026
University of Guelph	\$2.5 million CAD
AI-Driven Biodiversity Restoration: Scalable Solutions for Ecosystem Monitoring and Conservation	
Role: Collaborator	
NSERC CREATE Grant	2026
University of Guelph	\$9.9 million CAD
AI-Driven Training of Next-Generation Conservation Scientists	
Role: Collaborator	

ACADEMIC SERVICE

Pathway to Increase Standards and Competency in eDNA Surveys (PISCeS) Conference	2026
University of Guelph	
Conference organizer and volunteer	
39th Canadian Artificial Intelligence Conference	2026
Simon Fraser University	
Reviewer for Long and Short Papers Track	
GBADs Informatics Technical Workshop	2023
University of Liverpool	
Workshop organizer	

Pathway to Increase Standards and Competency in eDNA Surveys (PISCeS) Conference University of Guelph	2023
• Conference organizer and volunteer	
School of Computer Science (SoCS) Faculty Search Committee University of Guelph	2018
• Member of hiring panel for Associate Professor in Cybersecurity	
School of Computer Science (SoCS) Faculty Search Committee University of Guelph	2017–2018
• Member of hiring panel for 2-year Contractually Limited Assistant Professor in Cybersecurity	

ACADEMIC PEER REVIEW SERVICE

Ecology and Evolution, F1000 Research, Frontiers in Ecology and Evolution, Lifestyle Genomics, Mitochondrial DNA Part A, Molecular Ecology Resources, Molecular Biology Reports, Methods in Ecology and Evolution, Nature Communications

PROCEEDINGS

* Indicates students under my direct mentorship/supervision

The VII AMMCS International Conference (student oral presentation) Wilfrid Laurier University, Canada · Modelling the Interplay between IUU Fishing, Wholesaler Fraud, and Consumer Awareness in the Seafood Supply Chain	2026
Pathway to Increase Standards and Competency of eDNA Surveys (PISCeS) International Conference (oral presentation) University of Guelph, Canada	2026
Phillips, J.D. · Association rule mining for targeted spatiotemporal aquatic environmental DNA (eDNA) sampling	
Pathway to Increase Standards and Competency of eDNA Surveys (PISCeS) International Conference (poster presentation) University of Guelph, Canada	2026
*Toth, N., Antonie, M.L. and Phillips, J.D. · To correct or not to correct?: Assessing the multiple comparisons problem for association rule mining of environmental DNA (eDNA) detection survey datasets	
39th Canadian Conference on Artificial Intelligence (short paper and student poster) Simon Fraser University, Canada	2026
*Toth, N., Antonie, M.L. and Phillips, J.D. · To correct or not to correct?: Assessing the multiple comparisons problem for association rule mining of environmental DNA (eDNA) detection survey datasets.	
SoCS Undergraduate Summer Project Show and Tell (student oral presentation) University of Guelph, Canada	2025
*Cui, R.C., Yodzis, M.P., and Phillips, J.D. · The Importance in Design as a Computer Scientist	
CEPS Undergraduate Student Poster Day (student poster presentation) University of Guelph, Canada	2024
*Toth N. and Phillips, J.D. · Association Rule Mining of eDNA Datasets	

CBS Undergraduate Poster Session (student poster presentation) University of Guelph, Canada	2024
*Toth N. and Phillips, J.D. · Association Rule Mining of eDNA Datasets	
9th International Barcode of Life Conference (poster presentation) Estação das Docas, Belem, Brazil	2024
Phillips, J.D. · A Measure of the DNA Barcode Gap for Applied and Basic Research (<i>not attended</i>)	
GBADs Informatics Technical Workshop (oral presentation) University of Liverpool, England	2023
Phillips, J.D. · The GBADs R Package (and Why We Need It!)	
CEPS Student Research Day (student poster presentation) University of Guelph, Canada	2023
*De Vuono-Fraser, F.A. and Phillips, J.D. · Estimating Seafood Mislabelling Rates in Canada Using Bayesian Modelling	
Pathway to Increase Standards and Competency of eDNA Surveys (PISCeS) International Conference (poster presentation) University of Guelph, Canada	2023
Phillips, J.D. · Haplotype diversity reveals challenges and opportunities for developing targeted detection assays for <i>COI</i> in Canadian freshwater fishes	
8th International Barcode of Life Conference (oral presentation) NTNU University Museum and Norwegian Biodiversity Information Centre, Norway	2019
Phillips, J.D. · HACSIm: Iterative extrapolation of haplotype accumulation curves for assessment of intraspecific COI DNA barcode sampling completeness	
Guelph BioMathematics and Statistics (BioM&S) Symposium Artificial Intelligence and Machine Learning in Biology (attended) University of Guelph, Canada	2019
CEPS Undergraduate Student Poster Day (student poster presentation) University of Guelph, Canada	2018
*French, S.H. and Phillips, J.D. · Estimating Sampling Size Using Haplotype Accumulation Curves and Semiparametric Models	
7th International Barcode of Life Conference (oral presentation) University of Johannesburg, South Africa	2017
Phillips, J.D. · Intraspecific sample size estimation for DNA barcoding: Are current sampling levels enough?	
6th International Barcode of Life Conference (poster presentation) University of Guelph, Canada	2015
Phillips, J.D. · An exploration of sufficient sampling effort to describe intraspecific DNA barcode haplotype diversity: examples from the ray-finned fishes (Chordata: Actinopterygii).	

REFEREED WORK
